PS 100

lithium

Arvipo PS100 lithium

New mechanical system, more potent, stronger, Lighter

**Professional pruning equipment
AGRICULTURE**

Cutting head maintenance free (Pat. ES1058462U).

Specifications PS100 lithium

Maximum Ergonomics: AIR SOFT Handle. Adaptable to any size of hand.

Weight: 895 g*
* According engine

Maximum cutting torque: 200 Nm*
* As working conditions

Diameter max. of Cutting: 40 mm.

Battery: 4.800 mAh LITHIUM

Full harness weight: 2.350 kg

Cut Type: Progressive and double opening

Autonomy: Up to 2 days

Cutting trigger

Cable connection/Ball joint shears (Pat. ES1062628U)

- * Cut meter
- * Level Battery
- * Consume intensity
- * Management historic

*** New *
LCD Screen**

- ROBUST:** Cutting head with bearings without maintenance. (No daily adjustment and lubrication)
- SAFETY:** Complies with current legislation on workable risks.
- RELIABLE:** Service Notice of every 500.000 service cuts.

Less consumption, more cutting power

Our Arvipo teams ensure total autonomy and high productivity.

With Arvipo work without fatigue, and total security, with minimal cost and maintenance.

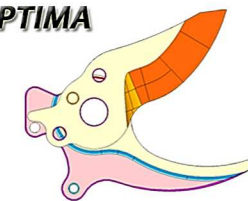

Professional pruning equipment Arvipo PS100 lithium, for intensive pruning is characterized for its power, high cutting speed, precision by servo control and low power consumption.

The progressive cutting control equipment, allows us the perfect control of the blade position throughout all the cutting cycle, thereby improving the access to any stem or branch. His special head mounted on bearings ensures a clean cut that favours easier healing, preventing illness.

New sheet and counter sheet of special steel AVP100 of high resistance to the wear and dent resistance.

2 types of cutting blades to cover all your needs
